

## Programming Assignment 13

Due at your recitation session on December 1-5

### Reading

Read Chapter 32 in the textbook.

### Programming

Make any changes to the filter project as required after the code review.

Comment the project, and extract comments in an external HTML reference manual with JavaDoc. Create a new task in ant (or make) called doc so that ant doc (or make doc) will generate HTML documentation for your code.

### Discussion Guidelines

The class discussion will focus on software craftsmanship.
